

# Implementation of the 2030 Agenda: challenges and opportunities

**Gonzalo Hernández Licona**  
**@GHLicona**

# The 2030 Agenda

- The 2030 Agenda is the result of **public consultations and engagement** with different stakeholders around the world. **Global agreement.**
- The 2030 Agenda covers **unfinished issues from the MDGs**, but aim **beyond poverty eradication: Leave no one behind.**
- These goals are intended to serve as a **guideline for achieving global sustainable development.**
- The SDGs hold tight links amongst each other, calling for **coordinated, multi-disciplinary work** in order to achieve them.
- Good opportunity for countries to **rethink their own development strategy**

## 2030 Agenda: Challenges

**Political agreement**

**No step-by-step  
handbook on  
implementation**

**This general  
agreement doesn't  
reflect the diagnosis  
of any single country.**

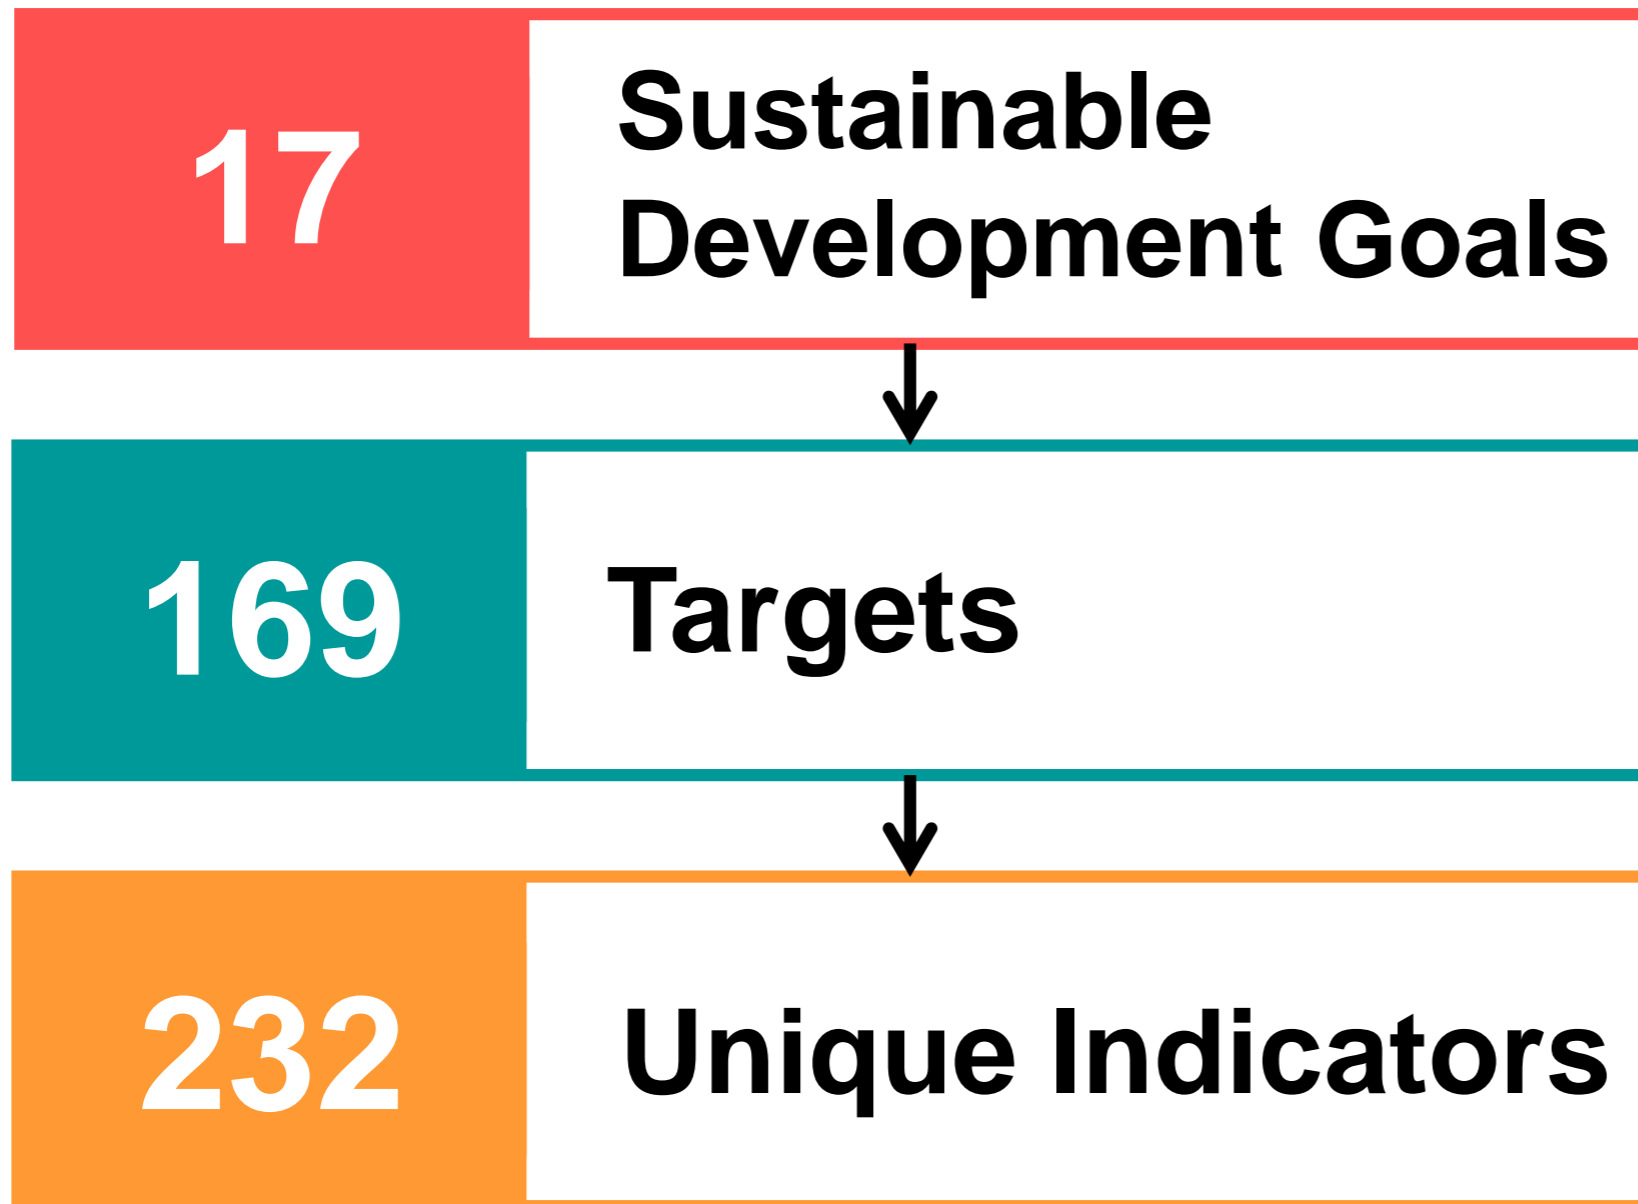

**Requires immense  
amount of  
*coordination* across  
sectors**

**Trying to handle 169  
targets and 232  
indicators may  
become a  
bureaucratic exercise**

**Technically  
challenging to  
measure all indicators**

**Countries have ongoing development strategies: Should they start from scratch?**

## Indicators challenges

**93** -Conceptually clear, established methodology and standards, available data regularly produced by countries

**66** -Conceptually clear, established methodology and standards, available data but not regularly produced by countries

**68** -Indicators for which there is no established methodology or it's being developed.\*

# Country specific challenges: SDGs + National Indicators

- Some countries, such as Mexico, will not only monitor the 2030 Agenda through the 232 unique indicators in the Global Indicator Framework, but will also **generate national indicators using local sources of information & methodologies**: National monitoring strategies.
- Thus: What about the **national priorities, the national tools, our own unique path to development?**

# Implementing the 2030 Agenda in Mexico

# Mexico and the 2030 Agenda

## What has been done?

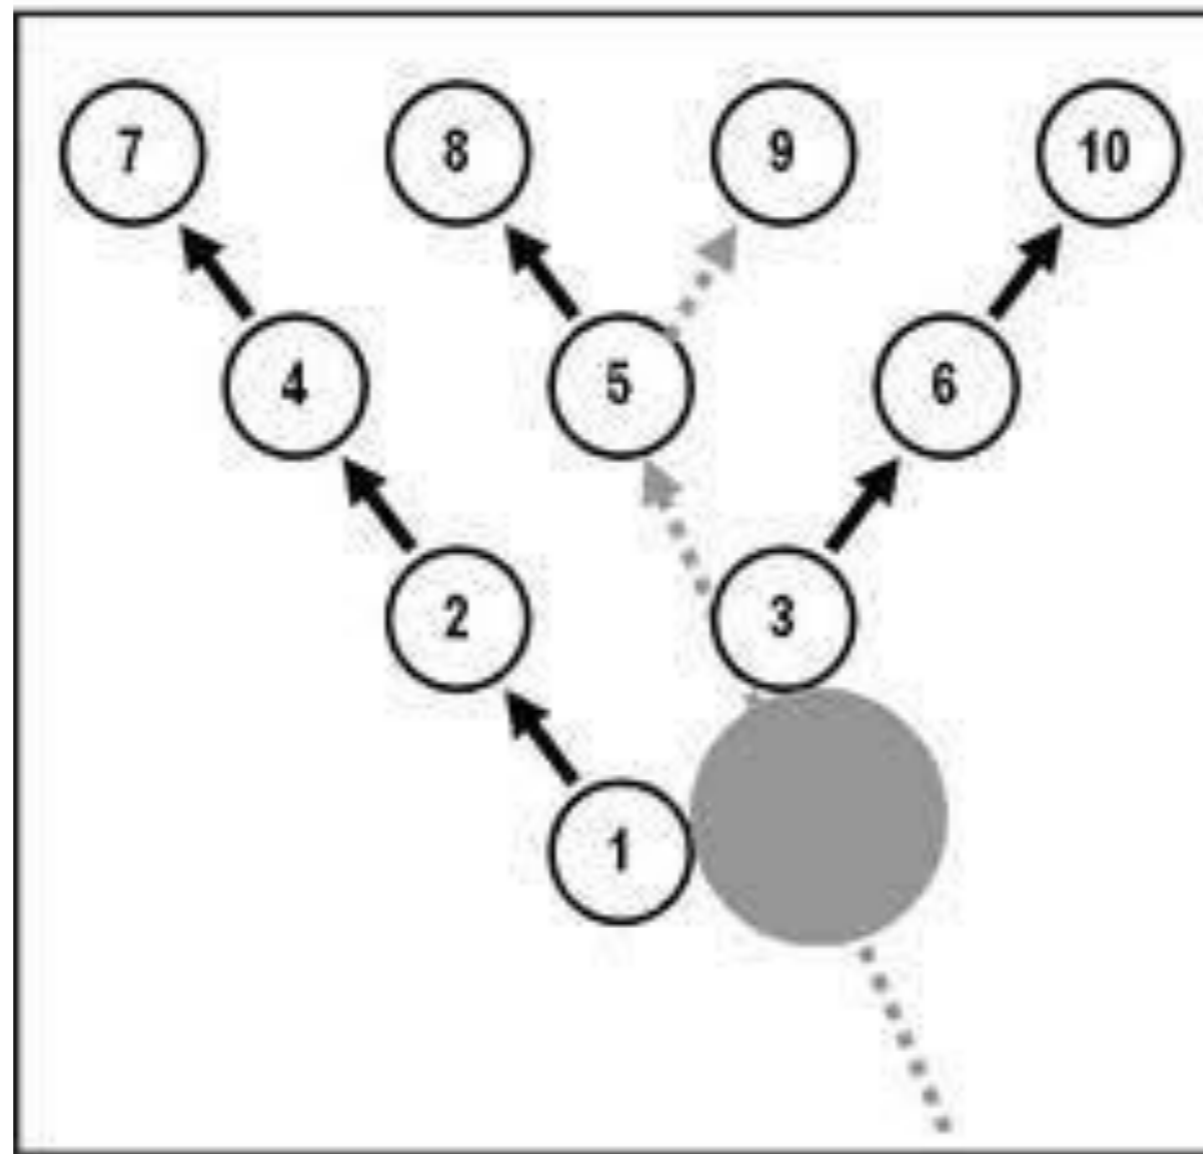

- Mexico **began** incorporating the 2030 Agenda towards the **end of 2015**.
- The President's Office **identified which SDGs were aligned with the National Development Plan**
- The **President's Office began working on a strategy for advising local governments** on how to incorporate SDGs into their policies
- A **National Council** for the 2030 Agenda on Sustainable Development was set in place during 2017
- The President's Office, in a joint effort with all key stakeholders, has created an **initial draft** for the National 2030 Agenda Implementation Strategy

## Going forward..

- Mexico is still in the *implementation-design* stage
- **How should Mexico go about the implementation to assure efficient results on development?**
  - **Prioritize** according to national agreements
  - **Coordinate** levels of government and strategies
- Follow up: monitoring and evaluation

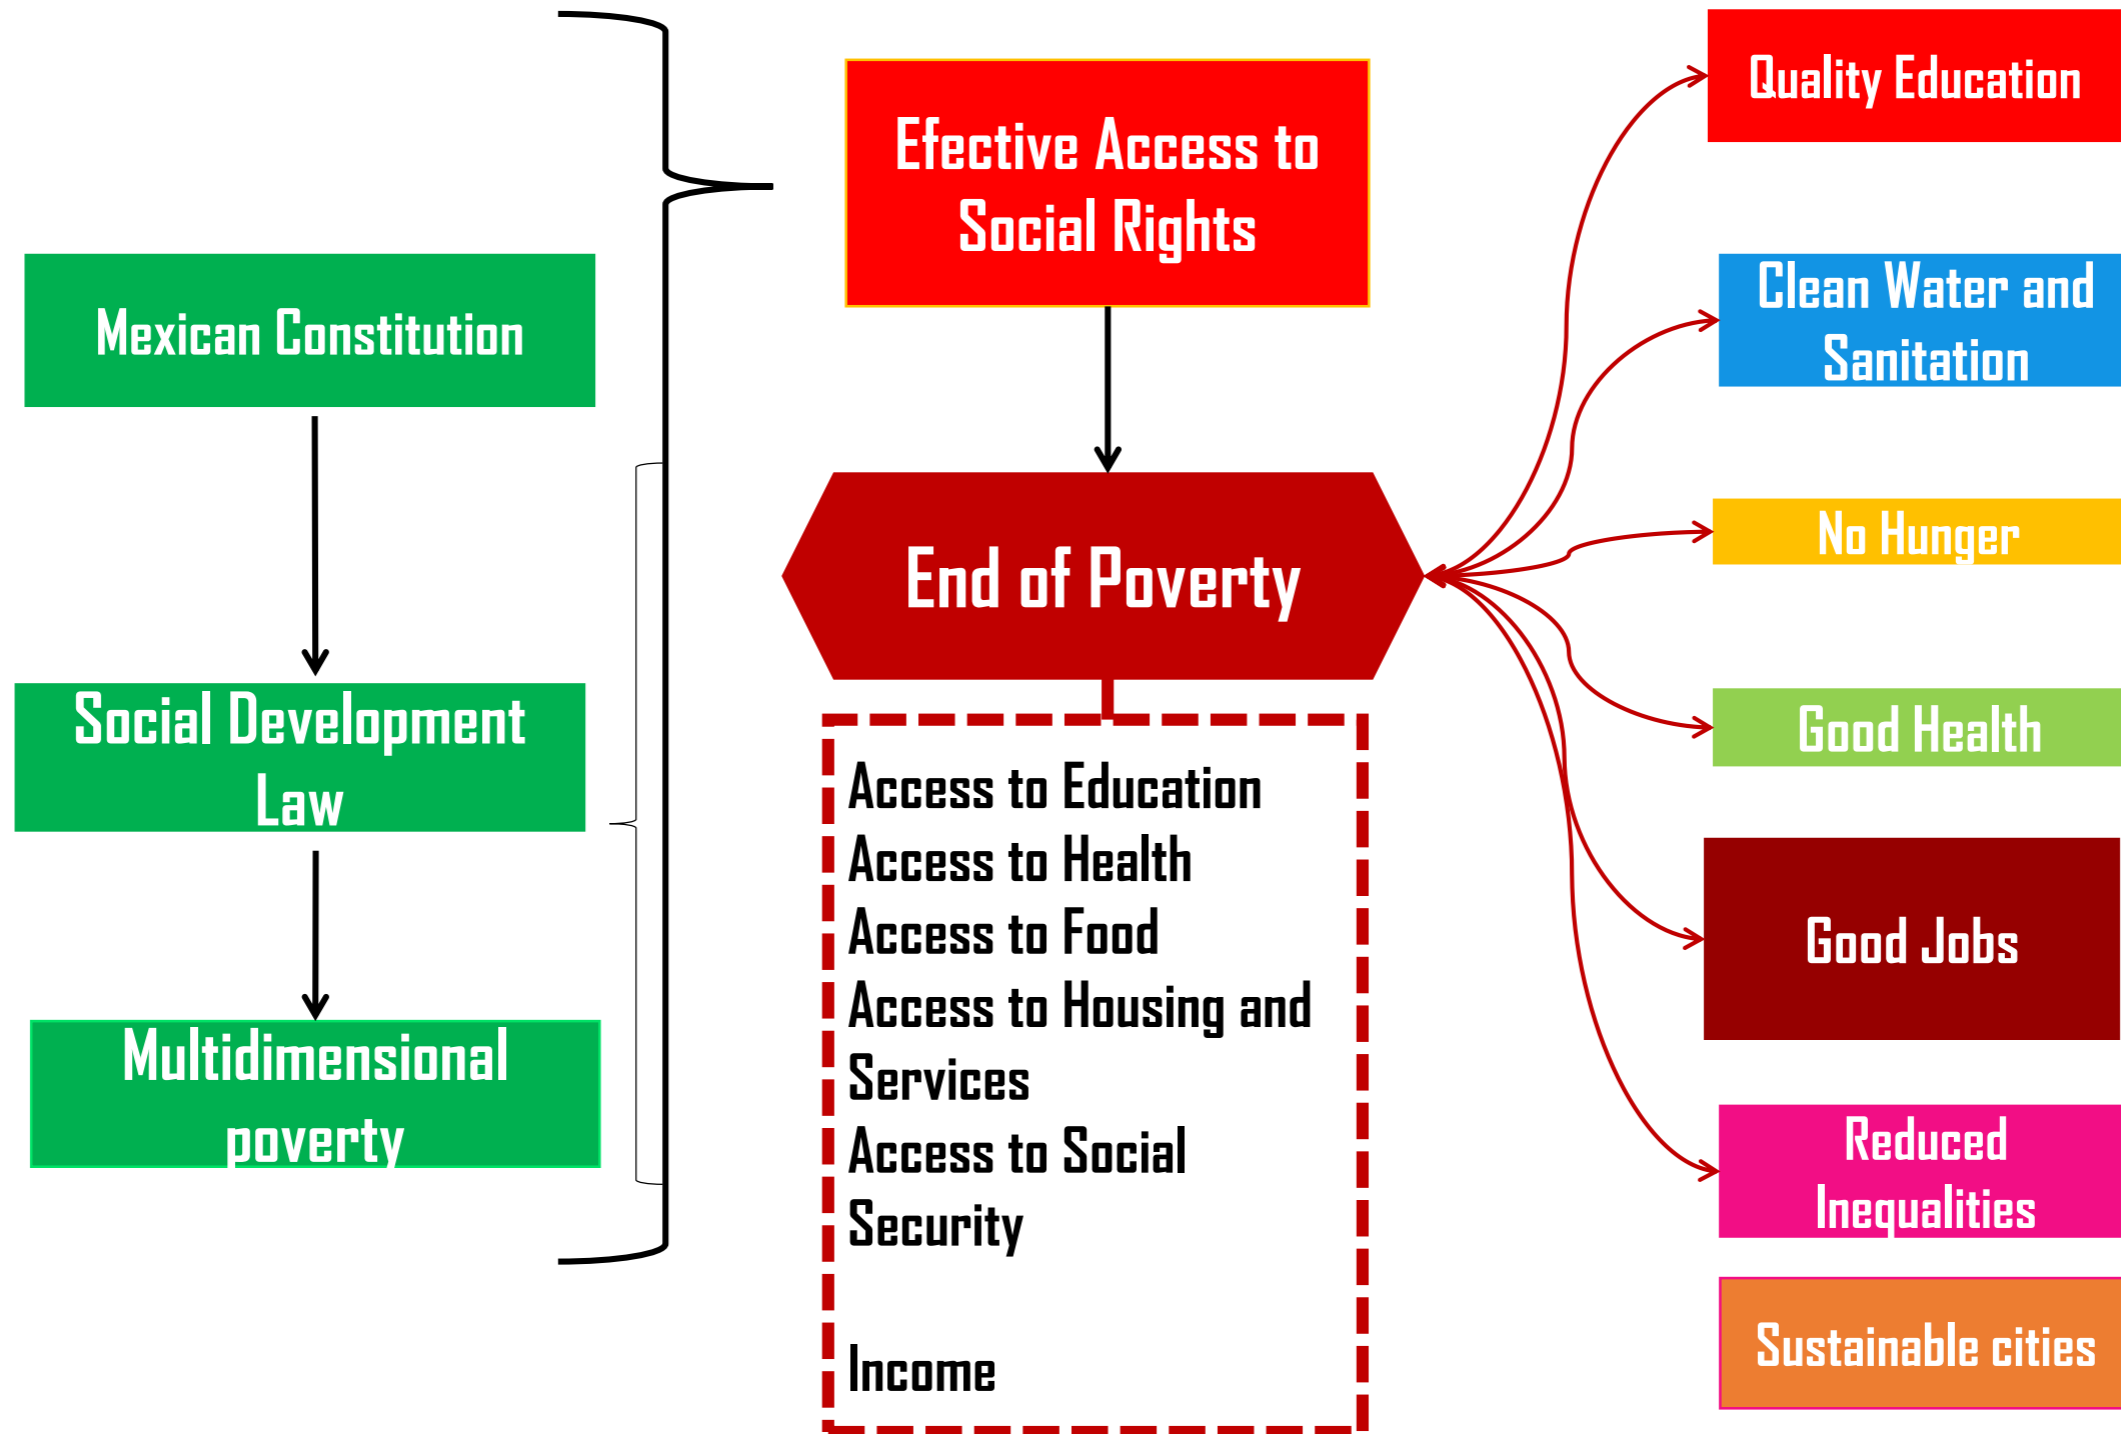

# Development and SDGs as a bowling strategy: Priorities and interlinkages

THE PERFECT STRIKE

# Development Priorities: Multidimensional poverty strategy.

MEXICO

2030 AGENDA

# Mexican multidimensional poverty measurement and SDG's

The Mexican multidimensional poverty measurement offers an entry point to the 2030 Agenda (TARGET 1.2)

Poverty indicator decomposable by groups

# Percentage of the population living in extreme poverty

## 2008-2016

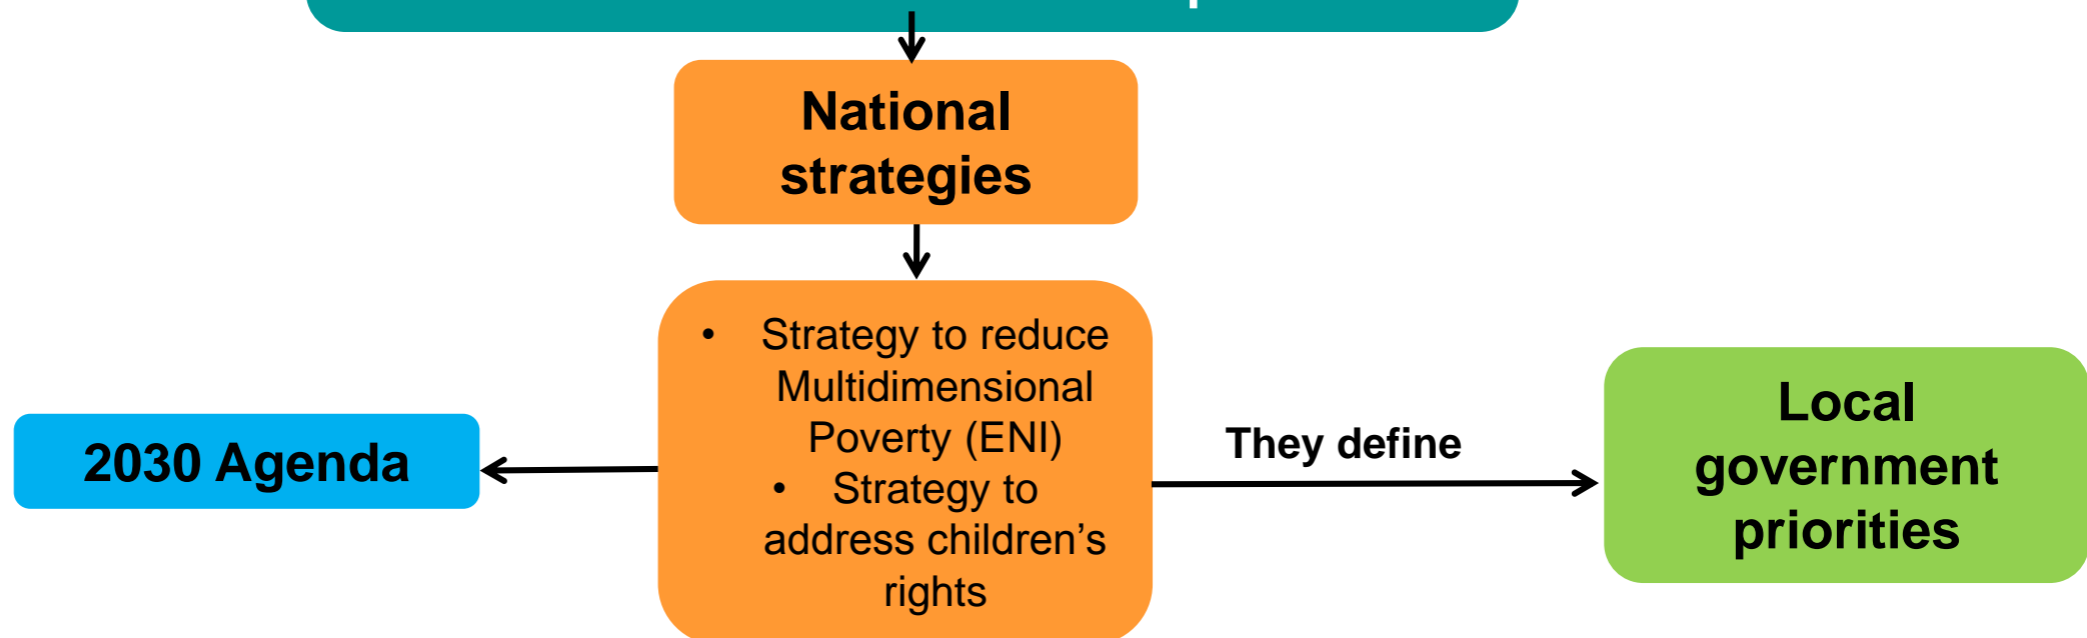

# Coordinating SDG Efforts in Mexico

In order to achieve the 2030 Agenda, **coordination** amongst a wide range of Mexican stakeholders will be required.

## Coordination challenges:

- Stakeholders only look after their own interests: silos effect
- Institutions are already in an operational overdrive
- Operations tend to become bureaucratic processes
- Some goals come to a loss for others, importance of establishing priorities

**Solution: Use coordination strategies that are already in place, improve them and enhance them to include SDG operations.**

**Leave no one behind**

**Thank You**
