**PROFILE**

I am an actuarial mathematician with social interests of long range. I speak three languages: English (TOEFL 101/120), French (DALF C1) and Spanish (native competence), and I am learning a fourth one, Russian. I am skilled in the disciplines I practice, both, professionally and for fun. I love working-out and playing chess and football. According to the *Strengths-Finder 2.0* instrument by Gallup, my dominant talents are: achiever, relation, ideation, inclusion and self-assurance. I enjoy developing myself through my research projects and I like to think of myself as a team player. I intend to live by the universal values. My life is a continuous attempt to bring these ideals to my job, my friends and those around me.

**Current position**
